

swissFineLine Silence

Noise protection

Noise protection: maximum sound insulation

swissFineLine Silence offers acoustic comfort in your home even in noisy environments

- swissFineLine Silence provides 46 dB sound insulation across the whole frequency range, which corresponds to noise protection class SK5
- Ideal solution for properties near busy roads, railway lines or approach flight paths
- swissFineLine Silence reduces the noise level of a freight train to that of a radio playing at very low volume
- Independently certified by testing institute ift Rosenheim GmbH

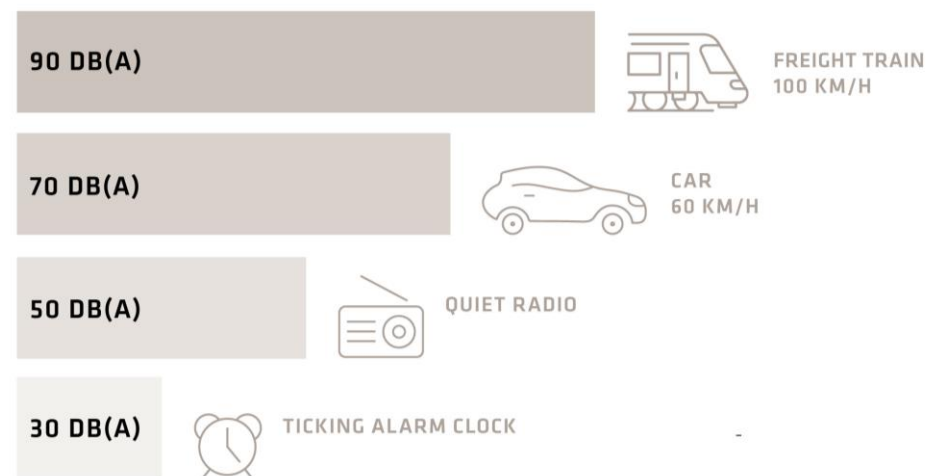

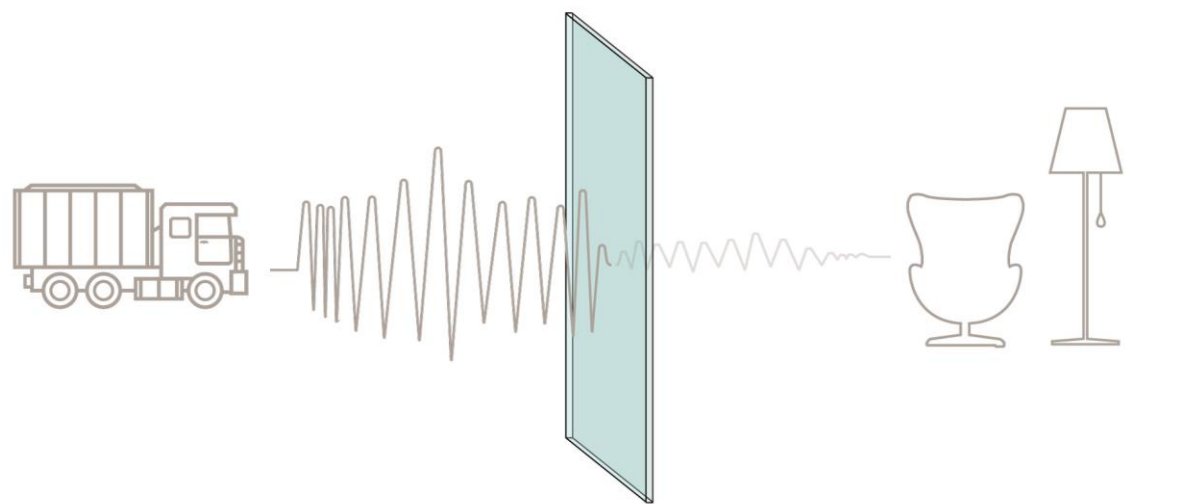

according to
EN ISO 10140
EN ISO 717

Noise protection: maximum sound insulation

A difference of 3 dB means double the sound intensity for the human ear

| NOISE OUTSIDE | NOISE REDUCTION | VOLUME INSIDE |
|---------------|-----------------|---------------|
| 90 DB(A) | -46 DB(A) | 44 DB(A) |
